RE: Boston Welding and Design

To Whom it may concern:

I have personally worked on various projects with Robert Diorio and Boston Welding.

They provided us with over \$400,000 worth of structural fabricated and installed steel at MIT W45 parking garage in Cambridge, MA. In addition they supplied and installed over \$300,000 worth of structural steel angles at Rockingham Mall in Salem, NH. There are several other smaller jobs that we have worked together on.

Boston Welding has always provided excellent service to us at a fair price. I consider them my "go-to" steel and welding supplier. The service is always consistent and meets or exceeds specifications and they have always been on schedule.

They have the capability for high-end shop drawings and work well with engineers such as THP Limited and SGH to name a couple.

As a General Contractor they make my life easier and consistently help us maintain budgets and achieve schedules.

I would highly recommend Boston Welding and Robert Diorio to any potential customer who is looking for a steel fabricator/ installer that will deliver on what they say for a fair price.

Please feel free to contact me if you need additional information.

Sincerely,

United Restoration and Preservation, Inc.
